## TRANSTANK CANADA BECOMES A REALITY

Several years of intensive and successful business development in Canada has culminated in Transtank securing a permanent presence in the land of the maple leaf with the official launch of **Transtank Canada Inc.**

Prior to setting up base in Canada and appointing management, Transtank put its range of **portable, self bunded** fuel and lubricant storage and dispensing equipment through rigorous testing to satisfy Standards requirements for the Canadian and US markets. Transtank is pleased to announce it has obtained approval to Standards UL142 and ULC142.

Transtank Canada Inc. is to be headed up by Colin Quinn in his position as General Manager. Colin has relocated to Calgary from Australia with his young family and is looking forward to working and living in such a beautiful part of the world.

In his management role, Colin draws on his extensive experience in the petroleum industry. Colin held key account roles with the Shell Oil Company of Australia before moving to Transtank, where he has spent the last several years in a key business development capacity. Colin's industry experience is well complimented by his background in mechanics.

Colin brings a passion and vibrancy to his new position at the helm of Transtank Canada. We wish Colin well and encourage you to drop him a line at [colin.quinn@transtank.com](mailto:colin.quinn@transtank.com)
